

ABSTRACT OF THE DISCLOSURE

The present invention is intended to provide a recycle guarantee method, a server applicable to the method, a recycle guarantee program, a computer-readable recording medium for the recycle guarantee program, a method of selling recycle-guaranteed products, recycle-guaranteed products, and recycle guarantee account. The recycle guarantee method is carried out by a server which receives recycling conditions of materials composing a product, stores the received recycle guarantee conditions together with a recycle guarantee information identifier, stores a guarantee code of the product in correlation to the recycle guarantee information identifier, searches the recycle guarantee conditions in response to the guarantee code, and outputs the recycle guarantee conditions. The invention is effective in enabling consumers to select and utilize products at their wills and to actively participate in the recycling.
